

Cool Energy & Coat provides a unique energy source derived from high-quality coconut oil and helps your horse stay energized, healthy, and manageable, both in the barn and under saddle.

**Ingredients:**

Wheat Starch, Coconut Oil, Chicken Broth, Fructooligosaccharides (F.O.S.), Potato Starch, Dried Whey Protein Concentrate, Mixed Tocopherols

**Guaranteed Analysis:**

Protein (min): 14%  
Fat (min): 30%  
Fiber (max): 7%  
Soluble Fiber (max): 4%  
Ash (max): 1%

**How and Why It Works:**

- **Coconut oil** is rich in **medium-chain triglycerides (MCTs)**, which support immune health, overall well-being, and promote a vibrant, glossy coat. Cool Energy is a unique way to supplement fat without adding additional Omega 6 which is already abundant in their hay. Excess Omega 6 causes systemic inflammation throughout the body.
- Additionally, unlike grain-based energy, **MCTs** deliver efficient fuel without creating the heat and excitability that can make horses difficult to handle. This makes it an ideal choice for maintaining focus, calmness, and consistent performance in training and competition.

*Daily nutrients provided when feeding ¼ lb of supplement:*

**Recommended Feeding Guidelines:**

**Begin with ¼ lb per day** and over a weeks time work up to the full recommended dose of 2 lb per day (based on the average 1100 lb horse). It is important to increase the dose gradually to allow the digestive system to adapt and reduce the risk of digestive upset.

For best results divide the amount into 2-3 servings per day.

**Race Day:** Consult us for tailored guidance.
