How and Why It Works:

- Enhanced Energy & Stamina:**
 Vital micronutrients support metabolic processes that convert food into usable energy, improving endurance and vitality.
- Soluble Fibers & Prebiotics:**
 Support immune function, bone health, and antioxidant defense, helping horses stay healthy and resilient over time.
- Replaces Nutritional Gaps in Forage:**
 Quality forage, such as hay and grass, supplies enough calcium, potassium, phosphorus, and magnesium. This formula focuses on essential vitamins, trace minerals, and micronutrients that are generally lacking in hay and grass.
